APPLIED BSC CERTIFICATION COACHING WORKSHOP

Practice your certification skills under the guidance of our highly experienced Eagleson Institute Instructors. Whether you are a beginner or an advanced certifier, this workshop's curriculum is personalized to meet your individual training needs. This program begins with a skills assessment and the curriculum is developed based on your objectives.

Beginner:

This individualized hands-on training reinforces the knowledge gained in our Safety Cabinet Technology class and Introduction to Certification workshop. This workshop takes place following our Safety Cabinet, Fume Hood, and Lab Design week courses.

Advanced:

This individualized training prepares you to take the NSF/ANSI accreditation exam and can help you meet your B2 certification report requirement. This workshop takes place the week before our Advanced Certification class and NSF/ANSI exam.

Agenda

Day One

- Skills Assessment
- Curriculum Development (you and your coach decide based on your goals)

Day One thru Five

- Implementation of designed curriculum through hands-on experiences

Registration:

Please reach out to eagleson@eagleson.org to register.

These are small group workshops with limited space available to ensure maximum coaching time for each participant.

Please note: Students must attend the weeklong class that accompanies each of the Applied Practice Workshops.
